Building Trust with Finesse

Finesse is a leader in enabling & securing digital transformation that provides managed detection and response services. We go beyond the foundations of a standard SOC and integrate a wide range of critical operations into a technological platform. Our platform accelerates threat detection, hunting, investigation, triaging, case management, and remediation.

Our Security experts help prevent breaches, mitigate risk and ensure regulatory compliance. We work alongside your team, providing crucial skills, knowledge, and expertise, as well as 24/7 coverage, leaving you without the challenges of employee hiring, management, and retention, or acquiring tool sets/ infrastructure log retention and related expenditures.

Managed Security Services

Our fully managed Cognitive SOC provides real-time monitoring of security events related to your digital infrastructure. The monitoring is carried out 24x7 to detect, identify and notify the security risks to our client's digital assets. Security events captured by the security platform will be correlated with the custom rules and then reported as alarms to the team to investigate.

Security Event Monitoring

- ✓ 24*7*365 Continuous Monitoring
- ✓ Automated event enrichment
- ✓ Incident validation and false positive isolation
- ✓ Dark Web Monitoring
- ✓ File Integrity Monitoring

Security Platform Management

- ✓ Security Platform Architecture
- ✓ Log Management
- ✓ SIEM Event Correlation
- ✓ SIEM Platform Optimization
- ✓ Proactive Tuning
- ✓ Reports

Detection and Response

- ✓ Real Time Threat Detection and Response
- ✓ Asset Discovery & Inventory
- ✓ Detection Engineering

Cyber Security as a Service

Enhanced Managed Security Services

Enhanced Managed Security Services require project planning that involves determining and documenting a list of specific tasks, deadlines and the additional costs involved. The outcome for any Enhanced Managed Security Service is to provide an effective and repeatable process for security services, as well as quantifying the overall integrity, coverage and thoroughness of the engagement.

- ✔ Security Incident Response
- ✔ Vulnerability Assessment and Penetration Testing
- ✔ Managed Endpoint Detection and Response
- ✔ Distributed Denial of Service (DDoS) Protection
- ✔ Ransomware Protection Service
- ✔ Patch Management Service
- ✔ Breach Assessment
- ✔ Threat Hunting
- ✔ Digital Risk Monitoring & Protection Service
- ✔ Deep Learning for Network Traffic Analysis
- ✔ CISO-as-a-Service (CaaS)
- ✔ Resource Augmentation (SIEM Expert and etc.)

Our Differentiations

- ✔ Robust Platforms
- ✔ Wide range of integrations
- ✔ Matured Process & Approach
- ✔ Faster Response to incidents
- ✔ Unique Dashboard View

The Cyber Hub Advantage

By partnering with Cyber Hub, organizations can take advantage of:

Domain Expertise: Cyber Hub team of security professionals have extensive experience. Performance is driven by metrics and service level agreement.

Unique Delivery Model: Our delivery model is based on the Information Technology Infrastructure Library (ITIL), and we deliver the service consistently with lower cost.

Strategic Alliances: Cyber Hub is partnered with most of the global leading security vendors.

Why choose Finesse's Cyber Hub

Cloud Security

Cloud Security is a shared responsibility and Cyber Hub experts at Finesse can help assess your Cloud platform and recommend to protect infrastructure, applications, and data in the Cloud.

Our cloud security includes:

- ✓ Cloud Security Posture Management (CSPM)
- ✓ Cloud Access Security Broker (CASB)
- ✓ Cloud Workload Protection Platform (CWPP)
- ✓ Kubernetes & Containers Security
- ✓ DevSecOps – SAST, DSAT, Source Code Protection
- ✓ CSA and CIS Cloud Benchmark Assessments
